Subashree S

Backend Developer

+91-9344485348 subashreesde@gmail.com LinkedIn GitHub Coimbatore, TN

Professional Summary

Backend-focused Software Engineer with a strong foundation in Node.js and modern web application development. Comfortable working across backend logic and admin-facing interfaces, with an emphasis on clean code, security awareness, and reliable API integration. Demonstrated ability to learn quickly, collaborate in team environments, and contribute to real-world software projects through internships and open-source programs.

Education

KGISL Institute of Technology **Coimbatore, India**

B.Tech in Information Technology — ***CGPA: 9.08/10*** *2023 – 2027*

Technical Skills

Languages: JavaScript (ES6+), Python, Java, SQL
Backend & APIs: Node.js, Express.js, REST APIs, WebSocket (Socket.io), Redis, JWT Authentication
Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
Databases: MongoDB, MySQL, Firebase
AI/ML Integration: OpenAI API, Google Gemini, LangChain, Ollama, Prompt Engineering
Testing & Automation: Selenium WebDriver, TestNG, JUnit, Postman, Page Object Model (POM)
DevOps & Cloud: Docker, Git/GitHub, CI/CD (GitHub Actions), Oracle Cloud (OCI), Basic AWS
Tools & Platforms: Streamlit, Cloudinary, Nodemailer, Azure Translator API, Multer

Experience

MERN Stack Developer Intern **Jun 2025 – Aug 2025**

Isaii *Coimbatore, India*

- Owned the end-to-end design and implementation of the admin dashboard frontend using React.js, improving order management workflows and reducing manual processing time by 35%.
- Implemented backend API–level PII data masking for sensitive user fields, reducing exposure of confidential data by 40% across client-facing modules.
- Optimized REST API performance by introducing Redis-based caching and query optimizations, reducing average response time from 480ms to 180ms (62% improvement).
- Worked closely with backend and DevOps teams to integrate services into the production system supporting 10,000+ monthly transactions with 99.7% uptime.

Open Source Contributor **Feb 2025 – Mar 2025**

GirlScript Summer of Code (GSSOC) *Remote*

- Ranked **517 out of 42,000+ global contributors** (Top 1.2%) with 785 points across 17 merged pull requests in production-grade JavaScript and MongoDB repositories
- Contributed critical bug fixes and feature enhancements to open-source MERN stack projects, improving code quality and maintainability for 50,000+ developer community
- Implemented performance optimizations reducing database query execution time by 40% in high-traffic Node.js applications

Projects

SmartUzhavan | *React, Node.js, Express, MongoDB, Socket.io, Docker, Firebase, Azure API* | Live | GitHub **2025**

- Built bilingual (Tamil/English) AI-powered agricultural assistant serving 200+ farmers with real-time crop disease diagnosis, weather forecasting, NDVI analysis, soil health monitoring, and market price tracking
- Achieved sub-5 second response time for AI queries using OpenAI/Gemini models with LangChain orchestration; automated 80% of routine agricultural queries through intelligent chatbot integration
- Implemented geospatial mapping with Socket.io for real-time disease outbreak tracking across farming regions, enabling collaborative farmer networks with location-based insights
- Dockerized full-stack application with CI/CD pipeline; deployed on cloud infrastructure with 99.5% uptime and ¡200ms average API latency
- **Impact:** First Runner-Up at Hackspora 2K25 (140+ teams); diagnosed 20+ crop varieties with 85%+ accuracy

CampusDoc | *React, Node.js, Express, MongoDB, JWT, Cloudinary, Nodemailer* | GitHub **2026**

- Developed end-to-end document request and tracking system for college administration, eliminating 90% of manual document processing and reducing average fulfillment time from 5 days to 8 hours
- Architected secure authentication system with JWT and bcrypt, supporting role-based access control for 500+ students and 20+ administrative staff across multiple departments
- Integrated Cloudinary for PDF storage and Nodemailer for automated email notifications, processing 200+ document requests monthly with real-time status tracking and audit trails

VisualFlow | *Python, Streamlit, OpenRouter API, Mermaid.js* | Live | GitHub **2025**

- Created AI-driven code visualization tool converting Python/JavaScript code into animated flowcharts using OpenRouter LLMs and Mermaid.js, improving code comprehension for 500+ developers
- Reduced debugging time by 40% through interactive logic visualization; generated flowcharts in ¡3 seconds with 92% structural accuracy

E-Commerce Automation Framework | *Java, Selenium WebDriver, TestNG, Maven, POM* | GitHub **2026**

- Architected enterprise-grade test automation framework with Page Object Model for end-to-end e-commerce workflows (login, cart, checkout, payment validation) with 95%+ test coverage
- Implemented Extent Reports with automatic screenshot capture on failures; reduced regression testing time by 70% through parallel execution and config-driven test suites

Achievements & Recognition

First Runner-Up – Hackspora 2K25 Hackathon (Selected from 140+ teams; Cash Prize + PC Setup)
Top Submission – GenAI Exchange Hackathon by MeitY & Startup India (Recognized among top innovations)
Winner – Build Your Own AI Chatbot Hackathon (900+ participants nationwide)
KiTE Achiever Award – KGISL Institute of Technology for technical excellence
Cash Prize – Best Project Award
Active Hackathon Participant – 6+ hackathons in AI/ML and full-stack development domains

Certifications

MongoDB Node.js Developer Path – MongoDB University (2025)
React Advanced – Meta (2024)
Postman API Fundamentals Student Expert – Postman (2024)
GitHub Foundations Certification – GitHub (2024)
OCI 2025 Certified Generative AI Professional – Oracle (2025)
OCI 2025 Certified Foundations Associate – Oracle (2025)
